DETAILED ACTION

Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter: see item 5 of Final Rejection mailed 10/5/2007. The examiner agrees that applicant has shown unexpected results/ a synergistic effect occurs for the claimed Al-Mg-Si alloy sheet with the presently claimed composition, standard deviation of textures, and average value of crystal sizes along the sheet thickness, substantially as presently claimed.

Election/Restrictions

2. Claims 1-3 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 7-9, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 12/29/2006 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. Because the instant aluminum alloy composition (cl. 1-3) is hereby found allowable, then a method of making said allowable product (cl. 7-9, which are directly or indirectly dependent on allowable claim 1) is likewise allowable. See *In re Ochiai*, 71 F.3d 1565, 1572, 37 USPQ2d 1127, 1133 (Fed. Cir. 1995).
